## About Us

CompuMAX founders have over 20 years of experience serving clients in South Florida. The company evolved from a small family electronics repair store in the mid-1990s to full service information technology provider.

CompuMAX technicians are committed to professional, reliable and honest service.

Over the years we have served home users and small business as well as outsourced IT for big corporations. Today we are proudly providing high quality technology solutions to our customers. From computer repair and upgrades to network infrastructure setup and technical support, our technicians are always ready to help.

## Basic Services

Services like virus and malware removal, data back up, LCDs and laptop jacks repair, PCs and Macupgrades are our daily routine. However, together with our partners tools and innovative technology we are proud to be an IT solution provider for many small and medium businesses.

## Structured Cabling

Our team designs and implements projects of any size and complexity. From adding data or phone connection in your office to installing state-of-the-art video surveillance system with data retentions and remote monitoring.

## Network Security

Implement cost-effective solution that protects company networks, customer data, credit card information, and most importantly, your reputation. Package includes up to \$50,000 of coverage to help mitigate costs related to a data breach incident.
